**Introducing Dassault Aviation Business Services—
A New Name for One of Business Aviation’s Most Respected MRO Brands**

Saint-Cloud, France, October 5, 2022— As of today, TAG Maintenance Services, one of the industry’s major Maintenance Repair and Overhaul providers, will be rebranded Dassault Aviation Business Services (DABS). The new name reflects the important place this European network occupies within Dassault Aviation’s global MRO support organization, which includes 40 factory service locations and 20 authorized service facilities around the world.

Concurrently, Dassault reconfirms its commitment to supporting multiple OEM brands at Dassault Aviation Business Services. The network has broad expertise with Dassault aircraft and other OEM brands built up over decades of dedicated service. The company originated as Aeroleasing in 1966 and was renamed TAG Aviation in 1998.

TAG Maintenance Services was created following Dassault’s purchase of the maintenance operations of TAG Aviation in 2019. Later, the business jet MRO operations of RUAG in Switzerland were acquired and added to the network.

“Customers will see a new name, but the commitment to applying advanced technology and the ultimate in service quality will remain the same as ever,” said Franck Madignier, President of DABS. “In fact, since the acquisition by Dassault, we have invested heavily to expand to new locations, upgrade facilities and, as always, stay at the leading edge of the MRO business.”

Dassault Aviation Business Services runs full-service “one-stop-shop” operations in Geneva and Farnborough and additional service facilities in Basel, Lugano and Sion, Switzerland; Paris Le Bourget; Lisbon, Portugal; Luton outside London; and Luanda, Angola. It also operates a major Fixed Base Operation ranked among the Top 10 in Europe, with two strategic locations on the north and south aprons of Geneva International Airport.

DABS offers a complete range of maintenance capabilities, including major inspections, airframe repairs, avionics and cabin system upgrades, paintwork, and complete interior refurbishments. Its Geneva interior shop recently underwent an extensive modernization to enable it to continue offering a full range of top-notch completion services.

In cooperation with the Falcon Command Center, the DABS Maintenance Control Center based in Lisbon can dispatch a GoTeam to return an aircraft to service as quickly as possible following an Aircraft on Ground incident, wherever and whenever it may occur.

ABOUT DASSAULT AVIATION:

Dassault Aviation is a leading aerospace company with a presence in over 90 countries across six continents. Dassault designs and builds the family of Falcon business jets as well as the Rafale fighter jet. The company employs a workforce of over 12,000 and has production facilities in both France and the United States, and a worldwide service network. Since the rollout of the first Falcon 20 in 1963, over 2,650 Falcons have been delivered. The tri-jet and twin-engine lines offer outstanding efficiency and comfort, with ranges from 4,000 nm to 7,500nm. They include the new flagship Falcon 10X, the pioneering Falcon 7X and 8X, the extra widebody Falcon 6X, and the versatile Falcon 900LX and 2000LXS.
